DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8-13 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyazaki et al. (6,489,733). Miyazaki et al. disclose, in Figs. 2, 3, 5 and 6, a circuit for reducing a leakage current for a plurality of MOS transistors (transistors in Fig. 5)" comprising: "a detection circuit (Fig. 6) for automatically generating an up signal and a down signal based on a determination as to what side of an inflection point that an initial value of the leakage current is disposed"; and "a bias circuit (Fig. 7) for automatically providing an adjusted back bias voltage (vbp11 and vbn11) that enables the least amount of leakage current by the plurality of MOS transistors", all connected and operating similarly as recited by Applicant.

Claims 4-7 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terry Cunningham whose telephone number is 571-272-1742. The examiner can normally be reached on Monday-Thursday from 7:30 to 6:00.

Application/Control Number: 10/611,396
